MODEL	SIZE (mm)					WEIGHT (Kg)	MAXIMUM LIFTING CAPACITY (Tons)	VOLUME AIR (Liters)
	Length (mm)	Width (mm)	Thickness when deflated (mm)	Stroke (mm)	Diameter when deflated (mm)			
25T	560	560	50	295	792	8	25	260
60T	860	860	55	490	1216	18	60	900
132T	1300	1300	51	670	1838	37	132	3500

Characteristics

- **3 cushion sizes available** from 25 to 132 tons and fitting on the edge for optimal insertion of the lifting bag.
- These three cushions are stacked and connectable using a linking plate system, without any additional tools.
- Low insertion thickness for easy entry into tight spaces.
- Increased stability thanks to their octagonal shape.
- **Max pressure of 10 bar**, safety factor 4/1 and in accordance with EN 13731.
- Installation requires no tools.
- SBR material for high abrasion resistance and increased durability.
- Does not require a suitcase for storage in your vehicles.
