

Fire

MRC16

➤ Technical Information

DIMENSIONS DEPLOYED: 4500 x 4500 x 2400 mm

PACKED DIMENSIONS: 1100x630x450mm

REQUIRED SURFACE: 4900 x 4900 mm

INFLATION: 1x9L/300bar

MAXIMUM JUMP HEIGHT: 23m

WEIGHT: 70 kg

RESET TIME: 20s

DEPLOYING: 2 people in 30s

➤ Advantages

It is very stable and there is almost no bounce back. It always deforms towards the center. It is easily transported whether packed or inflated.

- Very light, standard connection.
- Safety valve to prevent overpressure.
- Easily inflatable and deflatable.
- Fast return to position after jump.
- Can be used on all kinds of surfaces.
