GREENSTAB

Technical Information

Dimensions: 92x245x1064-1804mm

Minimum Length: 1,064 mm

Maximum Length: 1,804 mm

Body Material: Aluminum Alloy

Head and Foot Material: Steel

Maximum Load: 2 tons

Weight of the strut: 7 kg

Weight of the kit: 19 kg

Advantages

- Non-slip foot that adheres to all surfaces. Removable plate allows for increasing the support surface of the prop depending on the situation (soft ground).
- To push back the boundaries, a 5m strap with an additional 5m extension + a 20cm strap to link two struts together.
- Thermal protection sheath on the strap.
- Innovative 3-in-1 head designed to adapt to all supports.
- Automatic adjustment system protected by a fibreglass shell.- Unique 18-positions deployment system, every 43mm.
- A never-before-seen innovation: quick and easy folding at the touch of a button.
- Quick installation with built-in level to check the angle at 30°.
- Robust thanks to its authorised load capacity of over 2 tonnes.
- Indestructible carrying bag
